

EZ Sign™

4.2 & 2.9 Inch E-Paper Display

USER MANUAL

Safety Precautions

These precautions contain important information to ensure the safety of you and others, and to prevent personal injury or

ATTENTION

Improper handling may result in minor injury to the user or cause property damage.

Installation, Storage, and Operating Environment

- Do Not Disassemble

Do not disassemble this product. Doing so may cause malfunction or damage.

- Do Not Bend or Twist

Bending or twisting the product may cause malfunction or damage.

Please ensure that the product is not bent or twisted during handling or installation.

- Do Not Submerge in Water

This product is not designed for underwater use.

Do not submerge it in water, as doing so may cause malfunction.

- Do Not Allow Water Exposure (for non-IP65 * products)

Do not expose non-IP65 products to water, as this may cause malfunction.

If the product becomes wet, discontinue use immediately.

- Operating Temperature (during data rewriting): 0 to 50° C

- Storage Temperature (during display/storage): : -25~60°C

*IP65 indicates a rating that provides complete protection against dust and prevents harmful effects from water jets

Notes on Operating Environment (for IP65 certified products)

- Although the product is dustproof and waterproof, long-term exposure to water or use in environments with

- Whenever possible, prevent dust or water droplets from directly contacting the product.

If dust or moisture adheres

- For storage, keep the product in a general indoor environment whenever possible.

Safety Precautions

Handling the Screen

- Do not rub the product's screen with sharp objects.
- When cleaning the screen, gently wipe it with a soft cloth.
- If using a cleaning agent, do not use alkaline or acidic detergents.
Please use a neutral detergent diluted with water.

Avoid High Temperatures and Direct Sunlight

Using the product in excessively high-temperature environments may cause malfunction.

- Exercise caution when storing or using the product inside vehicles exposed to direct sunlight.
- When touching a product that has become extremely hot, use gloves or take other precautions to avoid injury.

Other Precautions

- Do not subject the product to impacts such as dropping.
Strong impact from drops or similar accidents may cause malfunction or damage.

Cases Not Covered by Warranty

The following cases may not be covered under warranty:

- Damage or malfunction caused by bending, twisting, impact, or dropping
- Scratches, dirt, or discoloration of the product
- Malfunctions resulting from the customer's usage environment or handling
- Evidence of disassembly or modification

Product Overview

EZ Sign™ (hereinafter referred to as “the Product”) is an electronic paper display that is rewritten via NFC (Near Field Communication / 13.56 MHz band).

Since the display consumes no power while showing an image, the product does not contain an internal battery.

Rewriting is powered by energy supplied through NFC communication.

To rewrite the display, you must install the dedicated application on a smartphone (Android/iOS) or a Windows PC.

When rewriting using a Windows PC, please prepare your own NFC reader/writer.

- Recommended NFC reader/writer: Sony RC-S300

Notes

- Smartphones without NFC communication capability cannot be used with this product.
- Even with smartphones that support NFC, rewriting may be unstable or may not function depending on the model.
- The location of the NFC antenna differs by smartphone model.
Please check the position before use.
- Depending on the installation environment of the product, communication may become unstable or rewriting may not be possible.
- Nearby metal objects or magnetic materials may interfere with rewriting.
- Rewriting on metal doors, magnetic whiteboards, or while using a smartphone with a metal-decorated case may cause instability due to interference. Please take caution.

App Installation Guide

EZ Sign™ is compatible with most personal devices, including iPhone (iOS 11 or later), Samsung (Galaxy series), and Google Pixel.

iOS App

Android App

Scan to Download

The app icon appears as shown below.

App Name: EZ Sign™ NFC

Developer: Santek

Permissions & Privacy

- NFC: Used for writing data to the EZ Sign device.
- Photo Library: Used for loading and saving images.
- Personal information is not collected. Image processing is generally completed within the device.

Windows App

Download Link ;

An issue has been identified in which images may not save correctly, if the file name is changed during the saving process.

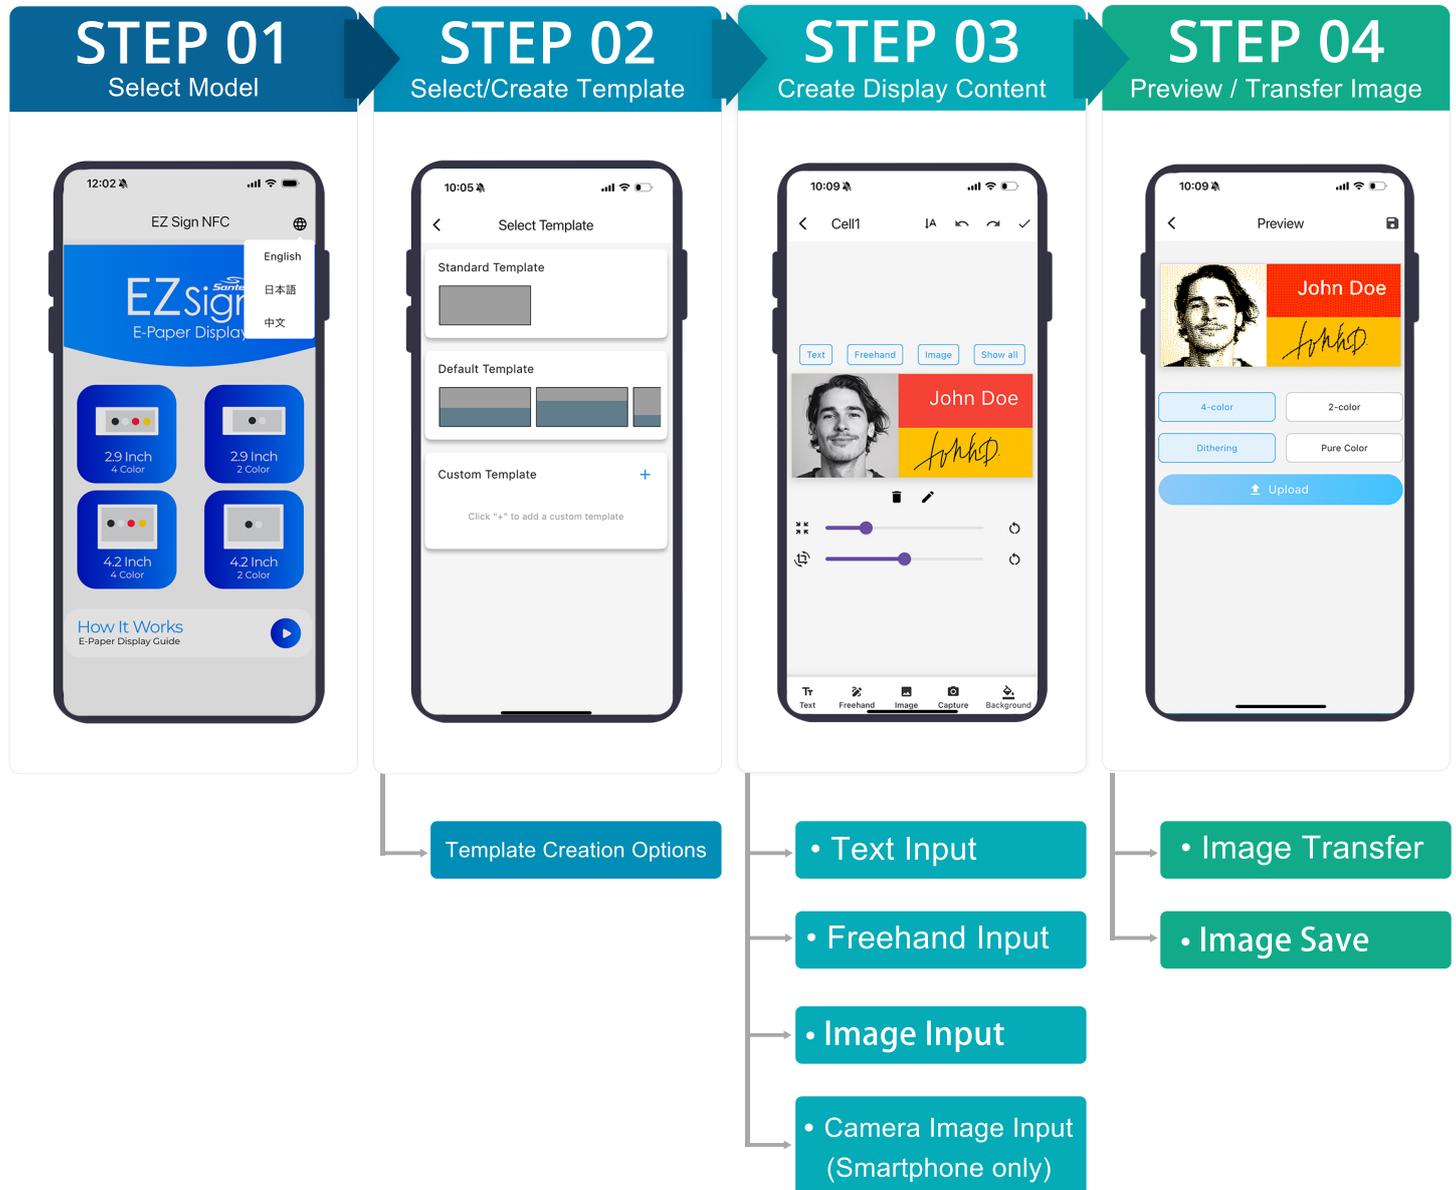

All other functions, including upload and rewriting, operate normally.

A fix for this issue is currently under development and will be released in an upcoming update.

We apologize for any inconvenience this may cause.

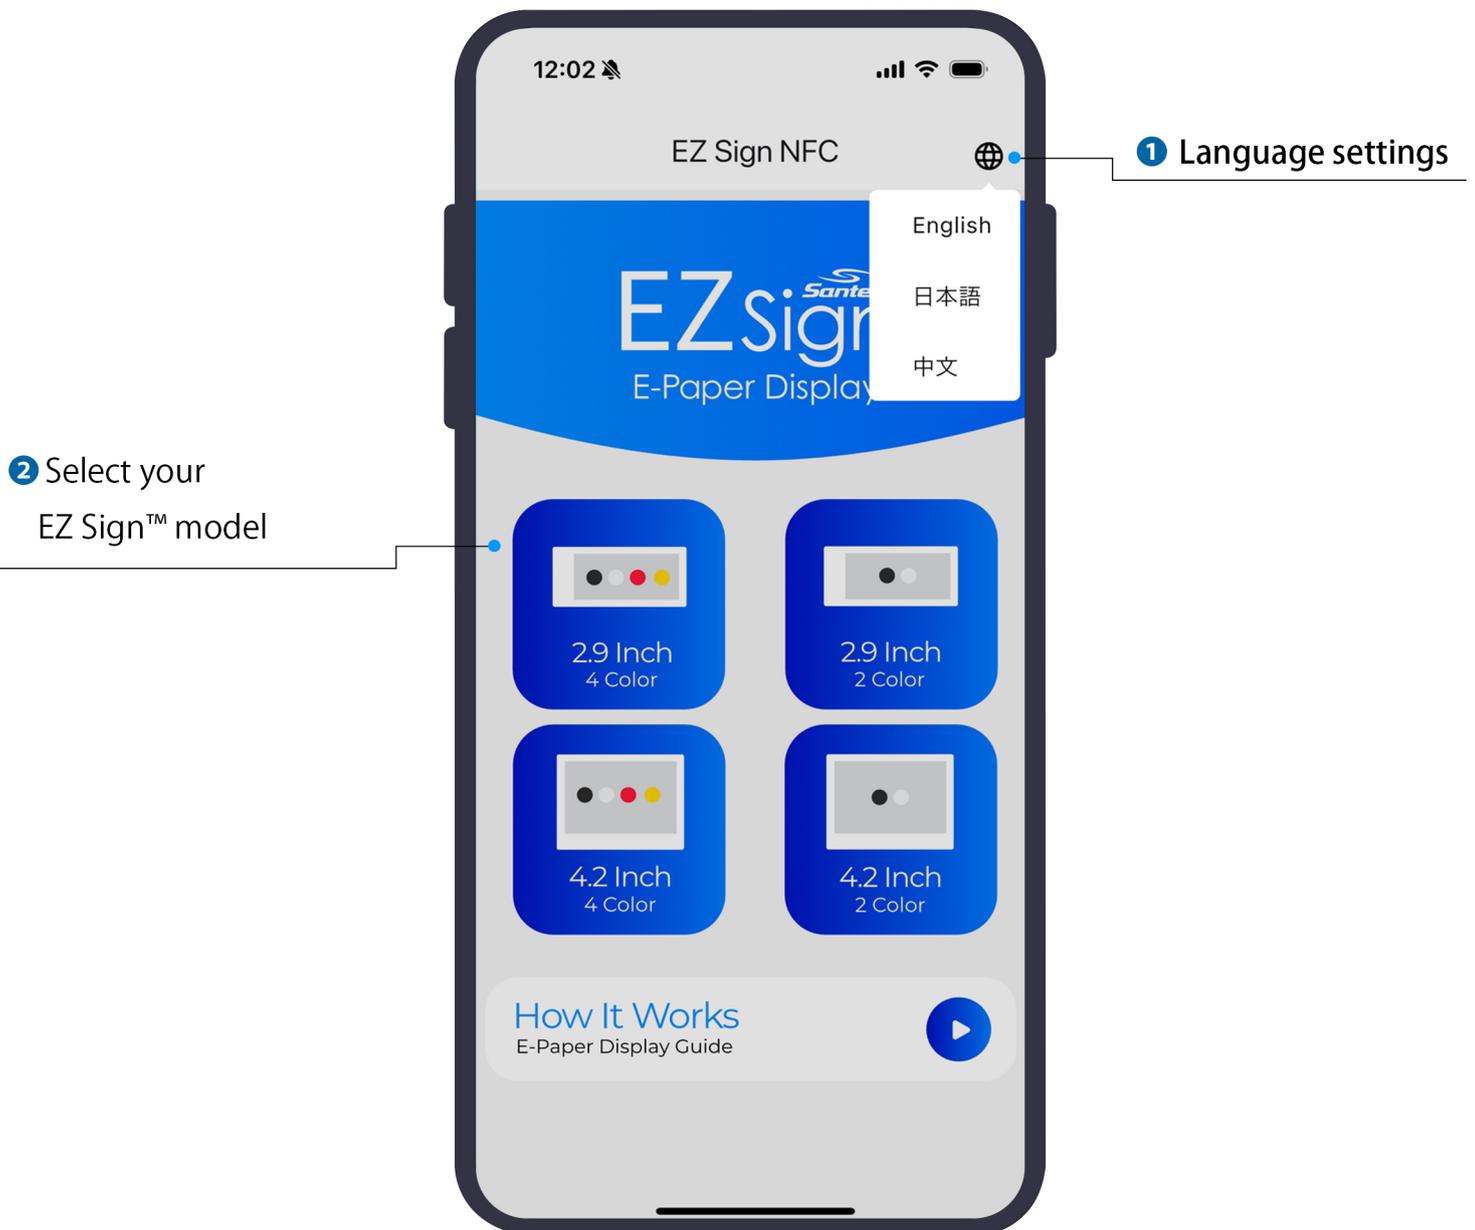

About the Rewriting Software

◆ Operation Flow

Product Selection

- ① Tap the globe icon 🌐 in the upper-right corner to select the menu language.
- ② Select the EZ Sign™ model that you want to write an image.

Finish or save

4 Add cells

1 Position setting

• Set the position using the X and Y axes.

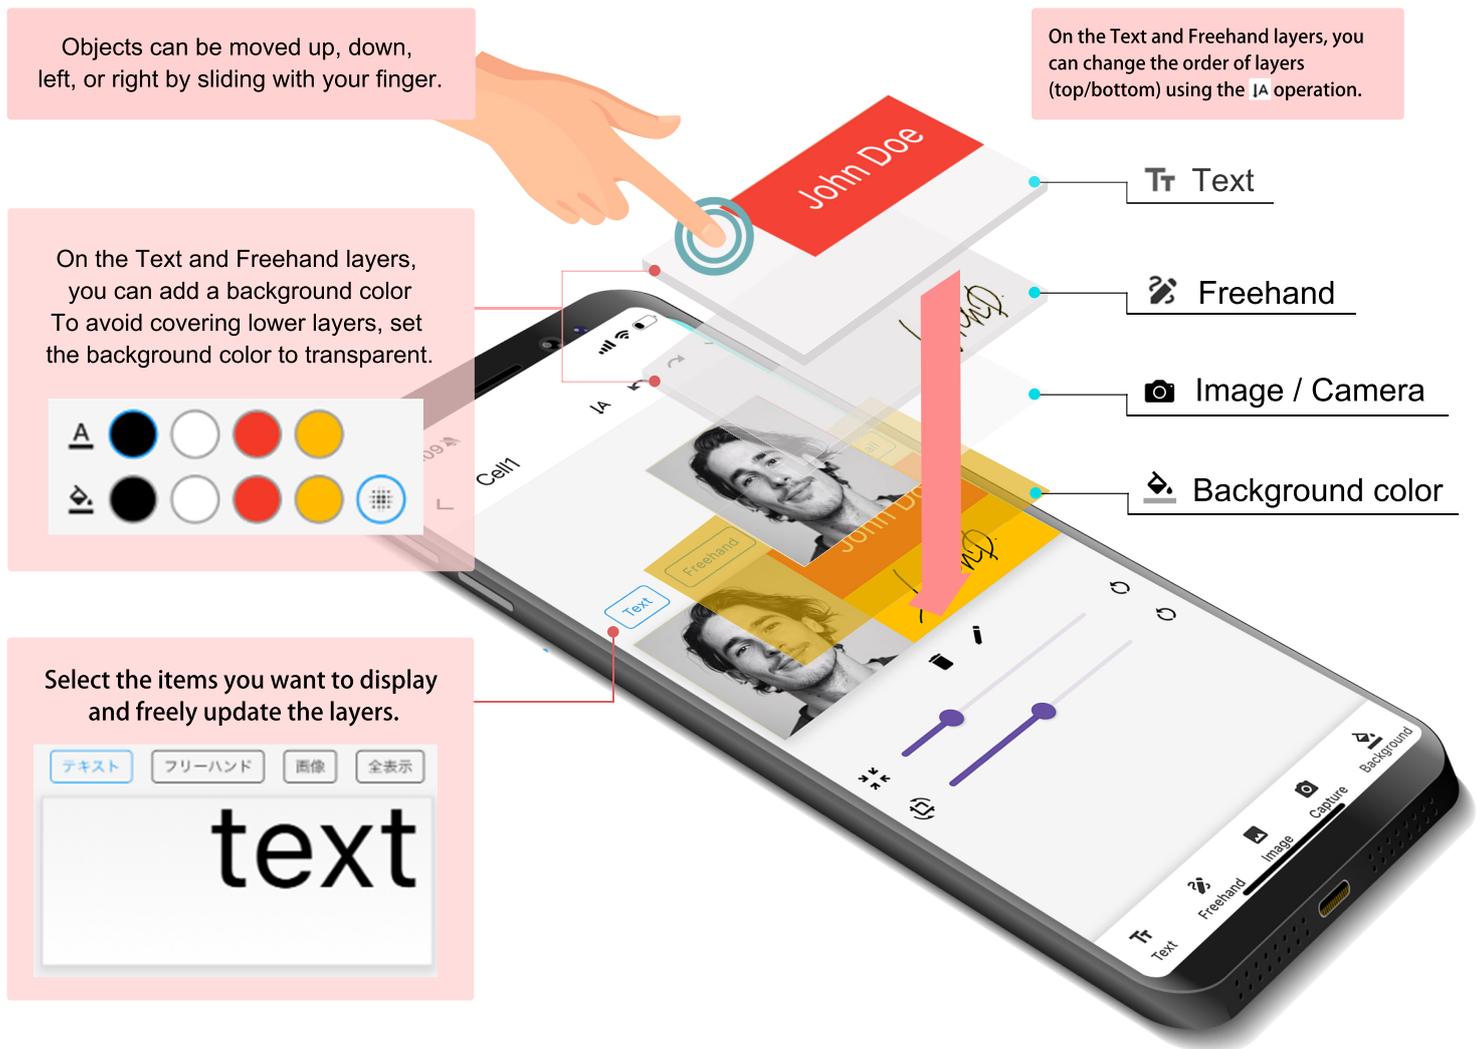

※ If a cell is left empty with nothing placed in it, you will not be able to add content to that area later. Please note that the area will appear in black when the template is rendered.

Creating Display Content

◆ Structure of Creating Display Content

- Elements use a layered structure (see below).
- Image Input (import from file) and Camera Image Input can only be used one at a time.

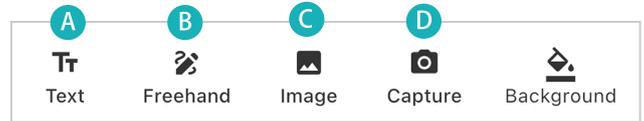

※Each cell consists of four layers stacked from top to bottom—text, freehand, image/camera, and background color—and a single object cannot span multiple cells.

This diagram is based on the 2.9-inch display editor.

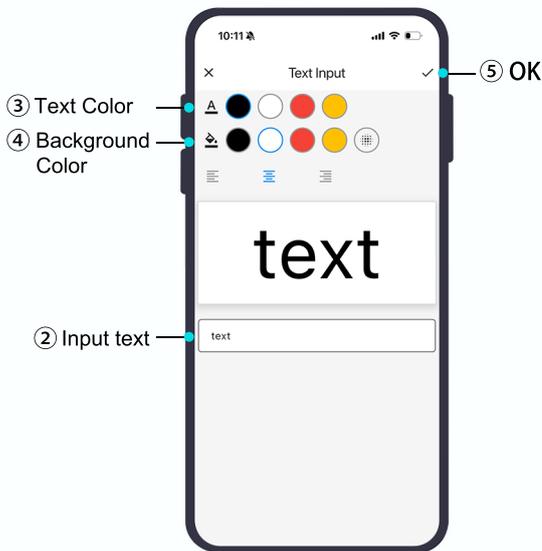

Creating Display Content

◆ Display Editor Guide

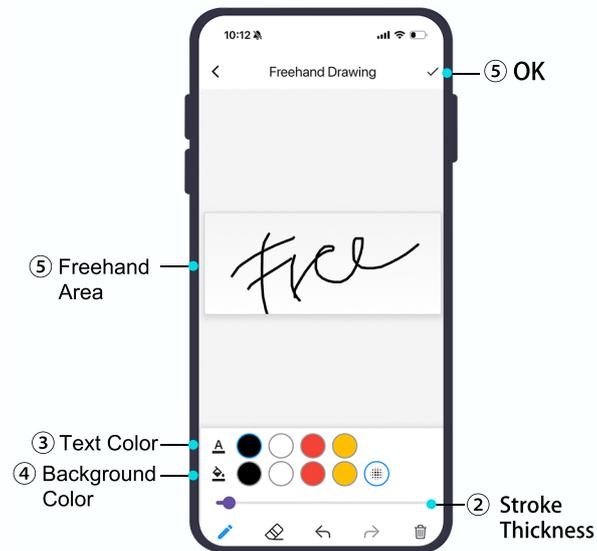

Text

- ① On the Display Editor screen, select the Text (Tt) icon.

B. Freehand

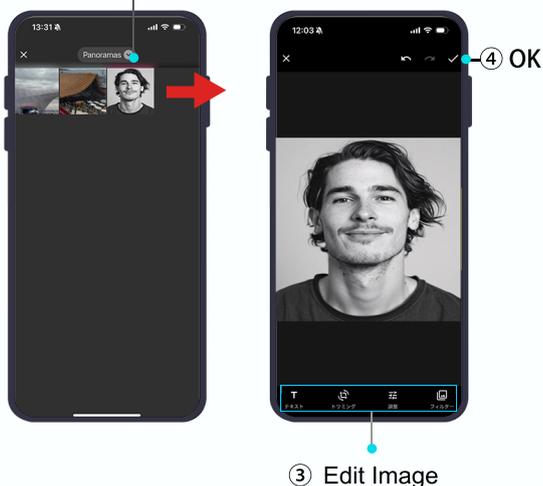

- ① On the Display Editor screen, select the Freehand icon.

C. Image

- ① On the Display Editor screen, select the Image icon.

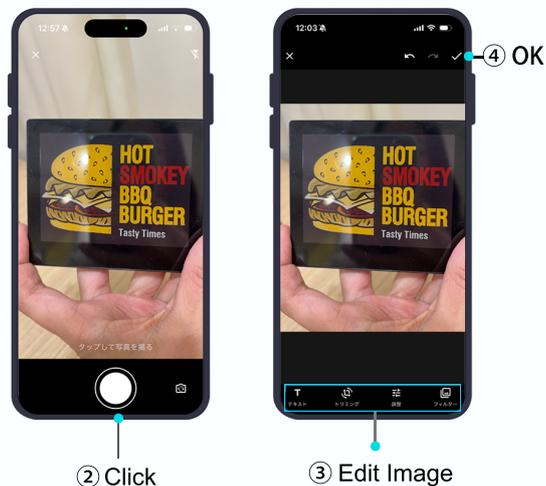

- ② Select Image

D. Camera

- ① On the Display Editor screen, select the Camera icon.

※ This feature is not available in the Windows app.

Creating Display Content

◆ Operation Tool Guide

Back to Previous Screen

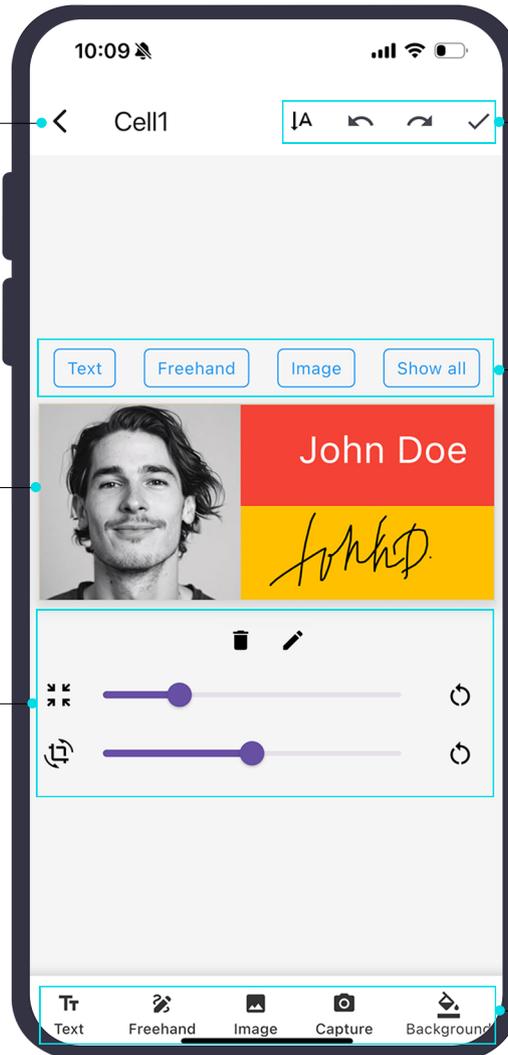

- Clicking this button will clear the current display.

Display Toggle Function

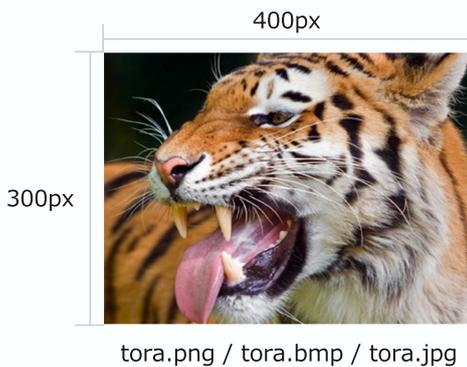

- You can show or hide specific objects in the display area.

Display Editor

Creating Display Images Using Image

- When creating images with commercial image editing software, please prepare the images according to the following recommended specifications.
- Image size 4.2inch: 400x300pixel 2.9inch: 296x128pixel
- Color specification for 8-bit RGB White : FF,FF,FF Black: 00,00,00 Red: FF,00,00 Yellow : FF,FF,00
- Save as BMP or PNG. For black-and-white images, it is recommended to save as B/W data.

Image Data Requirements – 4.2-inch

Create the image with a resolution of 400 × 300 pixels using only Black, White, Red, and Yellow. For 2-color images, use Black and White only.

Save the image in specific formats.

Supported formats:

4.2 Inch

Create the image with a resolution of 296 × 128 pixels using only Black, White, Red, and Yellow. For 2-color images, use Black and White only.

Save the image in specific formats.

Supported formats:

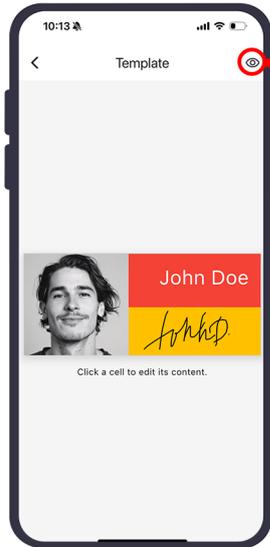

Preview / Image Transfer

◆ Preview – Image Transfer / Image Save

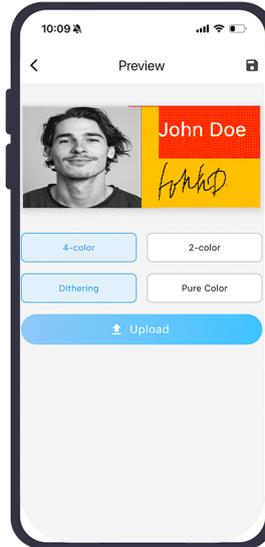

1 STEP 01 Creating Image

2 STEP 02 Final Check

3 STEP 03 Select Preview Rendering

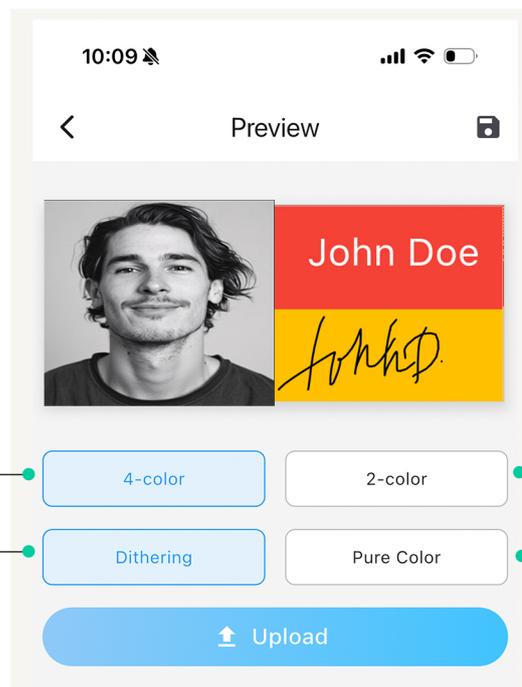

Press the Save button

- The rendered image displayed on the screen will be saved as a single image file with all layers merged.

Start Data Rewriting
